HD MONITORS

ACS' 1080p Full HD Monitors* come in a wide selection of sizes, ranging from 17 inches to 65 inches. All monitors utilize industrial grade wide screen LCD panels, which promise longevity. LED backlighting technology guarantees that they are Thinner, Lighter, Brighter, Better.

In addition to multiple display sizes, ACS offers an array of input combinations to meet your monitor needs. Our HD Monitors incorporate the most popular sizes and input methods, but if you have unique requirements, our team of seasoned engineers will design and build a monitor around those specifications.

*PLEASE INQUIRE FOR STANDARD DEFINITION LCD MONITORS

4K MODULAR MONITORS

INPUTS YOUR WAY

The first of its kind, the ACS 4K Modular Monitor offers a simple yet effective solution for complex input needs: you choose the inputs. In addition to displaying stunning image detail in a class of its own, this innovative monitor eliminates the headache of trying to match your needs to predetermined combinations – your monitor, your choice.

CUSTOMIZED INPUTS

*Low profile**

Customizable input modules allow various input combinations

Depending on the size, 4K Modular Monitors have two or three input modules, each housing an input method that you select. Standard input modules include HDMI**, SDI and Composite/Component. Ethernet and Audio Output are also available as module options.

* 2" AS OF SEPTEMBER 2017. THINNER MODELS IN DEVELOPMENT.

** DUAL HDMI INPUTS HDCP 2.2 COMPLIANT

Creating your perfect monitor solution is *easy*.

INSTALLATIONS

Whether you are just beginning to design the interior of your cabin or are seeking to upgrade older technology, ACS provides beautiful monitor options in multiple sizes. For our 1080p Full HD Monitors and 4K Modular Monitors, we offer many PMA-certified brackets and installation kits for seamless integration to your aircraft. Sky High Resolution and cabin interior design intersect to create the ultimate in-flight experience.

EASY-ASSEMBLY INSTALLATION KIT

Our easy-assembly installation kits consist of brackets, shrouds, and associated wiring harnesses. Create a custom, built-in look for your monitors to complement your cabin interior.

Using ACS' brackets, your monitors will appear to float like clouds in the sky. The clean, elegant finish will add polish to any cabin design.
